

Attila Huszár

JUNIOR FULLSTACK DEVELOPER

SUMMARY

With a degree in Socio-Economics, I bring a unique and well-rounded perspective to the technical field. I gained valuable experience in the commercial sector and honed my skills, but I was eager for new experiences, which led me to spend six years abroad as a self-employed individual, teaching me the importance of motivation and self-discipline. Now I'm excited to pursue programming, as I am confident this career path will allow me to apply my problem-solving abilities and keep growing.

MOTIVATION

I am driven by the challenge and satisfaction of programming. I seek out projects that allow me to continuously learn and improve my skills, tackle complex and meaningful tasks, and ultimately make a positive impact. With a strong foundation in problem-solving, I am eager to dive into new and exciting opportunities in the field.
